

Serial No.: 10/634,598
Amendment Dated July 27, 2004
Reply to Office Action Dated May 5, 2004

Amendment to the Specification:

Please replace paragraph [0039] with the following amended paragraph:

[0039] As mentioned above, each of the probe plate's 200 and 202 includes a plurality of hole patterns drilled to mate with a DUT. A number of probes such as 204 are placed in these holes. Once the probes are placed in the holes the probes form a probe field or probe pattern consistent with the hole pattern. The ~~[[probes 212]]~~ probes 204 may be placed and held in the center-drilled holes 208. In the alternative, the probes may be double socket probes with one socket mating with the first probe plate 200 and a second socket mating with the second probe plate 202.
